

Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed**1.1. Name of the Data, data collection Project, or data-producing Program:**

AKRO: Guided Angler Fish Landings

1.2. Summary description of the data:

Beginning in 2014, the the halibut Catch Sharing Plan (CSP) authorizes annual transfers of commercial halibut IFQ as guided angler fish (GAF) to charter halibut permit holders for harvest in the charter halibut fishery. GAF offers charter halibut permit holders in Area 2C or Area 3A an opportunity to lease a limited amount of IFQ from commercial quota share (QS) holders to allow charter clients to harvest halibut in addition to, or instead of, the halibut harvested under the daily bag limit for charter anglers. Charter anglers using GAF are subject to the harvest limits in place for unguided sport anglers in that area.

Information about GAF landings are submitted electronically through eFish, NMFS' integrated online system, and include details on when and where the GAF were caught, the number and length of fish, as well as permit, vessel, license, and logbook details.

1.3. Is this a one-time data collection, or an ongoing series of measurements?

Ongoing series of measurements

1.4. Actual or planned temporal coverage of the data:

2014 to Present

1.5. Actual or planned geographic coverage of the data:

W: -156, E: -130, N: 61.5, S: 53

Alaska, North Pacific, Gulf of Alaska, GOA, 2C, 3A

1.6. Type(s) of data:

(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)

Table (digital)

1.7. Data collection method(s):

(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys,

enforcement activities, numerical model, etc.)

Instrument: Not Applicable

Platform: Not Applicable

Physical Collection / Fishing Gear: Not Applicable

1.8. If data are from a NOAA Observing System of Record, indicate name of system:

1.8.1. If data are from another observing system, please specify:

2. Point of Contact for this Data Management Plan (author or maintainer)

2.1. Name:

Cathy Tide

2.2. Title:

Metadata Contact

2.3. Affiliation or facility:

Alaska Regional Office

2.4. E-mail address:

cathy.tide@noaa.gov

2.5. Phone number:

3. Responsible Party for Data Management

Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.

3.1. Name:

Jennifer Mondragon

3.2. Title:

Data Steward

4. Resources

Programs must identify resources within their own budget for managing the data they produce.

4.1. Have resources for management of these data been identified?

No

4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):

Unknown

5. Data Lineage and Quality

NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality,

objectivity, utility, and integrity of information which it disseminates.

5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible

(describe or provide URL of description):

Lineage Statement:

Guided Angler Fish (GAF) permit holders electronically report harvests through eFish, NMFS' web application. Entries are validated according to established business rules and loaded into NMFS Oracle tables.

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):

Authentication and authorization are required for Guided Angler Fish (GAF) permit holders before they can electronically report harvests through eFish, NMFS' web application. Entries are validated according to established business rules before they are loaded into NMFS Oracle tables.

6. Data Documentation

The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?

Yes

6.1.1. If metadata are non-existent or non-compliant, please explain:

6.2. Name of organization or facility providing metadata hosting:

NMFS Office of Science and Technology

6.2.1. If service is needed for metadata hosting, please indicate:

6.3. URL of metadata folder or data catalog, if known:

<https://inport.nmfs.noaa.gov/inport/item/26797>

6.4. Process for producing and maintaining metadata

(describe or provide URL of description):

Metadata produced and maintained in accordance with the NMFS Data Documentation Procedural Directive: <https://inport.nmfs.noaa.gov/inport/downloads/data-documentation-procedural-directive.pdf>

7. Data Access

NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

No

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?

No

7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:

Guided Angler fish landings data are sensitive under the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (2007) and can only be shared with authorized persons or in summary format for public dissemination.

7.2. Name of organization of facility providing data access:

Alaska Regional Office

7.2.1. If data hosting service is needed, please indicate:

Yes

7.2.2. URL of data access service, if known:

<http://alaskafisheries.noaa.gov/fisheries-catch-landings>

7.3. Data access methods or services offered:

Access to sensitive data shall only be granted to an individual that meets certain criteria. Access can only be granted to an individual if a signed and effective Confidentiality Agreement, Data Access Sharing Agreement, Memorandum of Understanding, Standard Statement of Nondisclosure, or similar agreement is in place. These signed agreements shall indicate that individuals have reviewed and understand the provisions in the manual governing the legal use of sensitive data. The signed agreements are maintained by the Alaska Regional Records office. The name of each individual that has signed a statement of nondisclosure for using sensitive data will be added to the Alaska Region list of authorized confidential data users.

7.4. Approximate delay between data collection and dissemination:

Unknown

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

The Alaska Region is still working out these details.

8. Data Preservation and Protection

The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:

(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

Other

8.1.1. If World Data Center or Other, specify:

National Archives and Records Administration

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:**8.2. Data storage facility prior to being sent to an archive facility (if any):**

Alaska Regional Office - Juneau, AK

8.3. Approximate delay between data collection and submission to an archive facility:

35 days

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection

IT Security and Contingency Plan for the system establishes procedures and applies to the functions, operations, and resources necessary to recover and restore data as hosted in the Alaska Region in Juneau, Alaska, following a disruption.

9. Additional Line Office or Staff Office Questions

Line and Staff Offices may extend this template by inserting additional questions in this section.
